At the moment:

I study algorithms, in particular I read the book Algorithms construction and analysis (Thomas Kormen)

 I study the FastAPI web framework

 Developing an information system automating task tracking and management enterprises. Simplified analogue of Atlassian Jira Implemented as a client-server application.

It is under development in a private repository, tk.

is a thesis;

- Mastering the sqlalchemy(alembic, pydantic) library;

- Improving knowledge of python syntax;

- Mastering pep8 and working on code cleanliness.
